

ACE-H30I50255CP Emergency LED Driver

Primary Specifications:

Output Power Max	Input Power Max	Input Current Max	Emergency Operating Time	Battery	Input Voltage	Output Voltage	Ambient Operating Temperature	UL Listed for US and Canada
30 W	14 W	130 mA	90 min.	LiFePO ₄ 24 Hour recharge 7 to 10 year Life expectancy	120-277 Vac 50/60Hz	50-255 V ¹	0 °C through 55 °C	UL and cUL (UL924) Emergency LED Driver

Description:

The **ACE-H30I50255CP** from AC Electronics is a UL Listed Emergency LED Driver that enables the same LED fixture to be used for both normal and emergency operation. The **ACE-H30I50255CP** contains a LiFePO₄ battery, a high-efficiency battery charger, control circuitry, and high-efficiency power converter circuits, in a single metal enclosure. In the event of a normal power failure, the **ACE-H30I50255CP** switches to emergency-mode and operates the fixture's LED array or module for

90 minutes at a constant power of 30 W. When normal power returns, the **ACE-H30I50255CP** returns to normal-mode. The **ACE-H30I50255CP** can be used in switched or unswitched fixture applications. The **ACE-H30I50255CP** can drive any LED array or module in emergency-mode with a voltage range of 15-55 Vdc and that can operate at a current range of 118 mA to 600 mA.

Additional Specifications:

- Normal (ac) driver maximum output current:.....5 A²
- Output current range:..... 118 mA to 600 mA³
- Surge protection:.....3 kVp
- Maximum case temperature Tc:..... 70 °C
- Nominal battery voltage:.....25.6 V
- Battery charge current:.....185 mA
- Metal enclosure IP rating:.....IP30
- Weight.....2.64 lb
- Dimensions:.....12.6 in L x 2.24 in W x 2.05 in H 12.0 in M

¹The emergency-mode output voltage operating range is 15 - 55 V. The absolute maximum output voltage is 60 V to comply with class 2 regulations.

²The Normal (ac) Driver maximum output current is the maximum current allowed to pass through the **ACE-H30I50255CP** circuitry in Normal-mode.

³The emergency-mode output current is automatically adjusted to maintain a constant output power across the output voltage range.

*Warranty: 5 years based on a maximum case temperature of ≤ 60 °C, 3 years warranty based on a maximum case temperature of ≤ 66 °C

5-Year USA-Backed Warranty*
See complete AC Electronics/ACE LEDS Warranty information for details.

Safety and Regulatory Compliance:

- UL and cUL Listed as an Emergency LED Driver (UL924)
- UL Listed for both field and factory installation
- UL & cUL Class 2 output (UL1310 compliant)
- CEC Title 20 compliant: Certified in CA Title 20 Appliance Efficiency Database – Battery Charger
- EMI: Complies to FCC commercial limits
- RoHS compliant

Features, Benefits, and Applications:

- Constant output power: Maintains constant emergency light levels over the full 90-minute runtime and over the output voltage range.
- Self-sensing output voltage: Automatically adjusts over the 15-55 V range to maintain constant power within the class 2 voltage range.
- Includes input over voltage surge protection, output short circuit, open circuit, and over-voltage protection, as well as over-temperature protection for improved reliability.
- Two-wire universal input: Reduces wiring errors and reduces installation time and complexity.
- Includes a miniature illuminated test switch status indicator: Enables mounting in small spaces.
- Suitable for indoor and damp locations.
- Compatible with a variety of LED fixtures, such as emergency-only fixtures, as well as new and existing fixtures.
- Isolated relay.

miniature illuminated test switch

Weight	2.64 lb		

Constant output power performance over full 90 minutes run-time

Constant output power performance over full output voltage range

INSTALLATION:

The **ACE-H30I50255CP** Emergency LED Driver may be used with either a switched or unswitched fixture. If used with a switched fixture, an unswitched (constant hot) lead must be connected to this emergency LED driver to allow the battery to charge properly and to maintain a charge when normal AC power is available. The emergency LED driver must be fed from the same branch circuit as the normal AC LED driver (if used). This emergency LED driver must not be installed with fixtures where the ambient temperature may fall

below 0 °C (32 °F), and it must be installed inside an electrical enclosure. The **ACE-H30I50255CP** Emergency LED Driver comes in a single metal enclosure with a separate miniature illuminated test switch status indicator. This emergency LED driver is suitable for installation in sealed and gasketed fixtures. The maximum remote mounting distance to the LEDs is 18 feet. The emergency LED driver metal case should be grounded. 18 AWG 600 V, 105 °C tinned stranded copper lead-wires are required for installation.

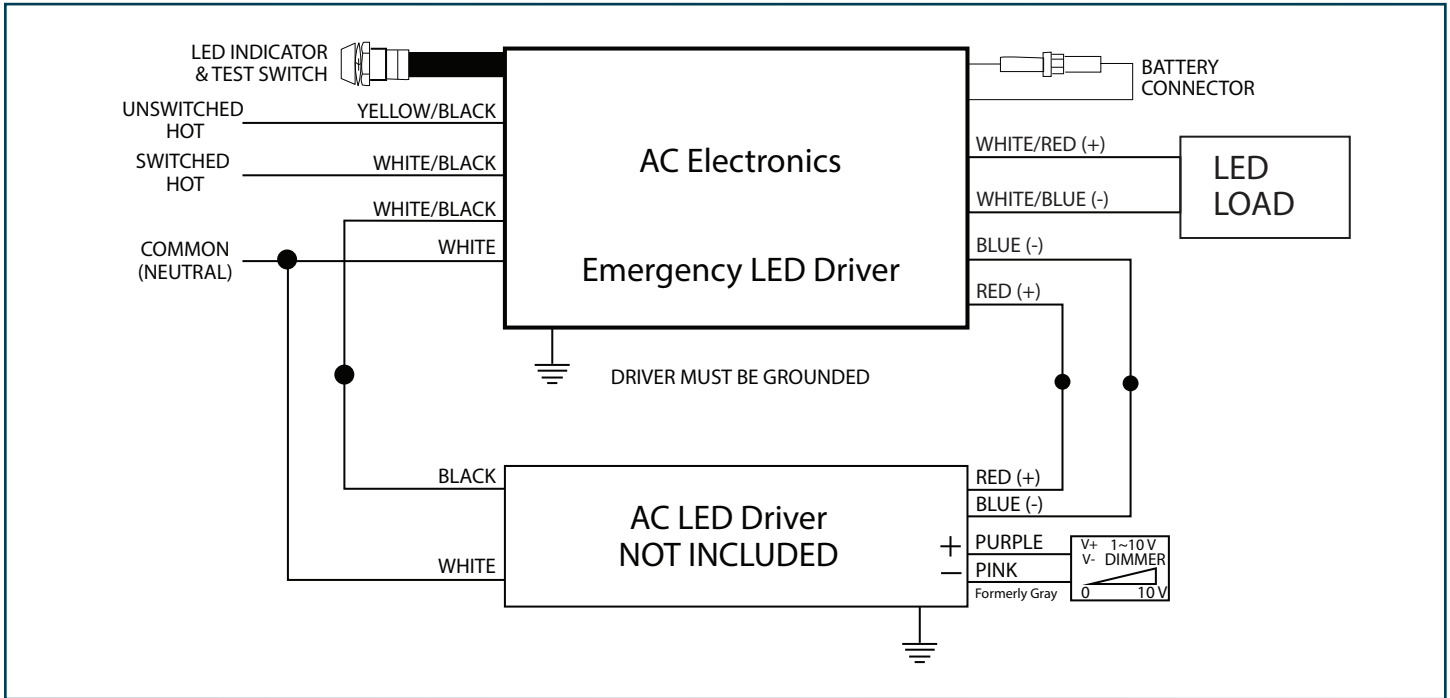

Specifications:

Emergency lighting shall be provided by using the AC Electronics **ACE-H30I50255CP** Emergency LED Driver with a compatible LED fixture. The **ACE-H30I50255CP** shall contain a LiFePO₄ battery with a nominal voltage of 9.6 V and 4600 mAh capacity, a high-efficiency battery charger, control circuitry, a high-efficiency two-wire universal input converter (120 through 277 Vac), high-efficiency output LED driver with soft-switching technology to prevent noise to protect LED modules, all contained in a single metal enclosure. A separate miniature illuminated test switch status indicator with installation hardware shall be provided for the purposes of performing periodic testing and indicate status change

of the battery and battery-charger. The **ACE-H30I50255CP** Emergency LED Driver shall be capable of delivering a constant power of 30 W to an LED load of 50 – 255 V for a minimum of 90 minutes. The **ACE-H30I50255CP** Emergency LED Driver shall have a maximum of 14 W input power and shall comply with emergency standards established by the current NEC and shall meet CEC Title 20 (California Energy Commission) efficiency standards. The **ACE-H30I50255CP** Emergency LED Driver shall comply with part 15 of the FCC Rules. The **ACE-H30I50255CP** Emergency LED Driver shall be UL Listed for field or factory installation. The **ACE-H30I50255CP** is suitable for indoor and damp locations.
